## ABOUT PROJECT

The purpose of this site is to provide the practical wisdom you need to make your home look its best. *THE ROYAL HUE* is the easiest way to paint your home or office. *THE ROYAL HUE* manages the entire painting. You will receive a call from our painting experts very soon after registered on our website. Then as per your comfort, we schedule a visit at your site and our qualified engineers will guide you with all your residential painting service requirements, keeping your budget intact. we also provide wall sticker and wall art as per their needs. We are always available, should you need any clarification or further customization.

## **USERS**

The customers who are looking for house/building painting.

## SYSTEM ANALYSIS

### Software Requirements

- Operating System
- Browser-Microsoft Edge/Chrome/Mozilla
- Text Editor-Visual Studio Code /Notepad++
- Client Side
  - **HTML**- Hypertext Mark-up Language, or HTML, is a mark-up language used to describe the structure of information on a web page. HTML is the foundation of a website it contains the information that tells the browser what is on the page in terms of text, links, where to find images.
  - **CSS**- it allows web designers, developer, bloggers, and so forth to make our websites unique and attractive. CSS gives us the opportunity to play with a page layout, adjust colours and fonts, add effects to images, etc.
  - **JavaScript**- JavaScript is a programming language used primarily by Web browsers to create a dynamic and interactive experience for the user. Most of the functions and applications that make the Internet indispensable to modern life are coded in some form of JavaScript.
- Server Side

**PHP-** Websites developed with PHP include faster processing features and they function easily which makes the data processing easy. It is compatible on all Operating Systems such as UNIX, Windows etc. Compatibility to upload into HTML. it is a free language with no licensing fees so the cost of using it is minimal. A good benefit of using PHP is that it can interact with many different database languages including MySQL.

- **Database**

**MYSQL-** MySQL is a freely available open source Relational Database Management System (RDBMS) that uses Structured Query Language (SQL). SQL is the most popular language for adding, accessing and managing content in a database. It is most noted for its quick processing, proven reliability, ease and flexibility of use.

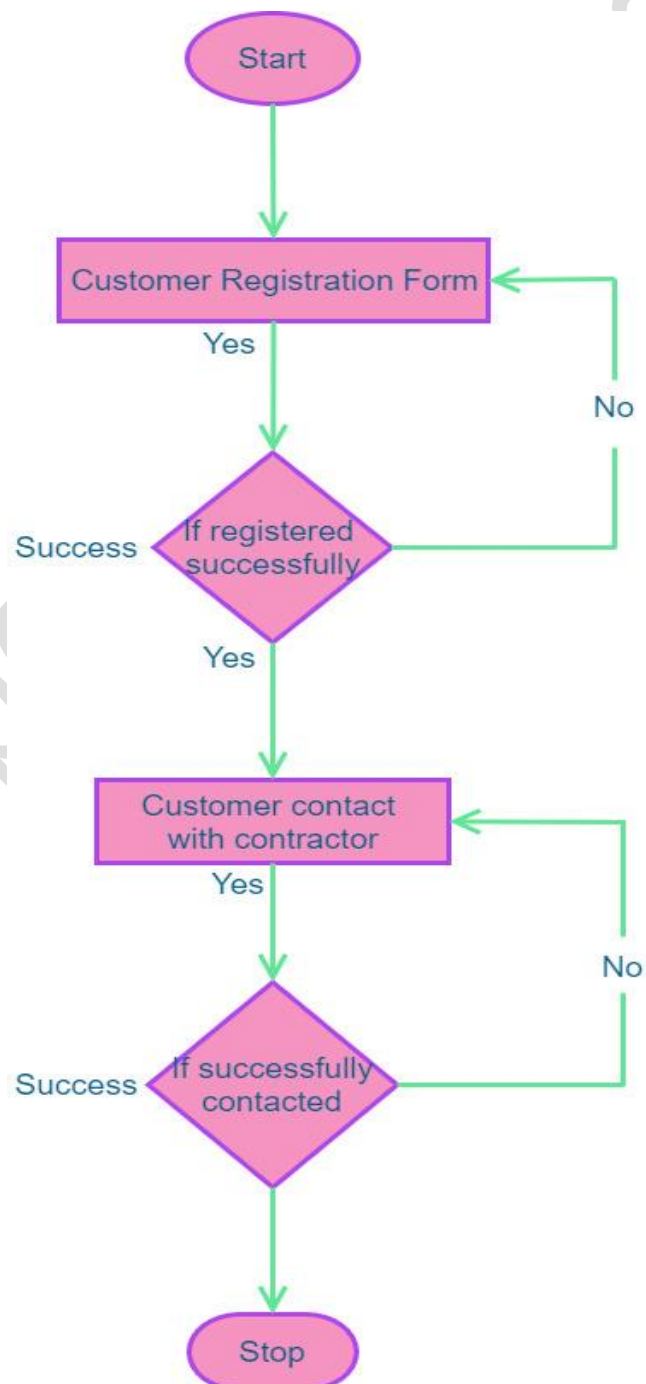

## **Hardware Requirements**

- A Working PC
- Good network Connection
- Processor-Minimum 1GHz or more
- RAM-2GB/4GB/8GB or higher
- Hard Disk Capacity-1TB or more

## Flow Diagram

A **website flow chart** shows the structure and makeup of any existing or planned website. They're useful for giving a broad overview of a website's content as well as for sketching out future additions.

## **EXISTING SYSTEM**

If a house/building owner wants to paint their house/building, they have to do many works themselves. Firstly, they have to find a shop for good brand and color of the paint. Most of the time, it is difficult to find their favorite color, because it may not be available in every shop. Then they need to find the quantity of paint needed. For this they should consult someone with professional knowledge, otherwise they have to guess it themselves and it can't be assured that the quantity may be less than or more than that is needed. Then they have to find painters for painting. This is really time consuming and exhausting. This is the existing system.

## PROPOSED SYSTEM

We at ***THE ROYAL HUE*** believe that art has no boundaries and work completely reflects that. We are also totally committed to the needs of our customers, giving them exactly what they want. Give your home a whole new look and feel with our house painting services! Reach out to us only if you are completely satisfied with our previous projects. Rest assured we surely won't disappoint you and we are always here for all your painting needs. The building owner should simply visit our website and register with required details. After registering on our site, you will receive a call from our painting experts very soon. Then as per your comfort, our manager schedules a visit at your site and will guide you, keeping your budget intact. Then on another suitable date, we will send our qualified painters to the site with all the required tools and paints also. The customer should pay 35% of money in advance, and the rest should be paid after the work is done. Needless to say, the cost for home painting service or painting a house wall interior depends on a number of factors such as the area to be painted, cost of the paint you pick, the complexity of the designs you choose. There is a discount for the customer. These things are also considered for wall art and wall sticker.
